

Table of Contents

Introduction	7
Part 1 PS/2	9
1.1 The Mouse Hardware Interface	11
Experiment	12
1.2 The PS/2 Software Interface	13
Terminology	13
Protocol Sequence	13
Error control mechanisms	14
Protocol timing	15
PS/2 Mouse Command Set	16
1.3 First words in PS/2: Reset-Acknowledge	18
Program Design Overview	18
Program 1	20
Critical timing constraints	22
The next step	22
1.4 Sequences and state machines	25
Host transmission	25
Host reception	27
Program 2	28
Ballistic profiles	33
MPLAB Gotchas	38
1.5 PS/2 as a background task	42
Motivation	42
Mechanisms	42
Program 3	46
1.6 Multi-channel voltage source	51
Instruction manual	51
Hardware Design	52
Software design	54

Part 2	USB	59
2.1	Some background on USB	61
	Low Speed Device Identification	63
2.2	Hands on the chips	65
	What do I need ?	65
	Implementing a USB mouse controller using FTDI's VNC1L 'Vinculum' chip	66
	Vinculum 'Gotcha'	67
	You will need	68
	Software	69
	System Setup	71
2.3	Testing the Host Controller	74
	Descriptors	78
	HID and Report Descriptors	83
2.4	Using the Host Controller in embedded designs	91
	A simple USB mouse driver	94
	Accessing Disk Drives	102
	Program Description	107
PART 3	Listings	117
3.1	PS/2 Programs	119
	Program 1 – Reset sequence	119
	Program 2 – PS/2 Core	122
	Program 3 – Interrupt-driven PS/2 comms. Display mouse position & button state on an LCD	129
	Program 4 – Voltage Source Program	167
3.2	USB Programs	178
	Program 1 – Usb 1	178
	Program 2 – Usb2	197
	Webliography	253
