About the Author	12
Introduction	13
Conventions used in this book	14
1 The Visual Studio C# Environment	15
1.1 Introduction	15
1.2 Obtaining the C# software	15
1.3 The Visual Studio development environment	16
1.3.1 The Form	17
1.3.2 The Code Editor.	18
1.3.3 The Toolbox	18
1.3.4 The Properties/Events window	19
1.4 Exercises	20
1.4.1 Your First C# Program	20
1.4.2 Properties	23
1.5 Solution Explorer	24
1.6 Program execution.	24
1.7 Number conversion.	24
1.8 Exercise: Simple calculator	25
Self Assessment Exercises	26
Summary	27
2 Common controls, properties and events	28
2.1 Introduction	28
2.2 The Button	28
2.3 The TextBox	28
2.3.1 Dealing with text in a TextBox	29
2.4 The ListBox control	31
2.5 The CheckedListBox	32
2.6 The CheckBox	32
2.7 The RadioButton	32
2.8 The NumericUpDown control	33
2.9 Displaying Images – the PictureBox control	33
2.10 Focus and TabIndex	34
2.11 Even more controls.	34
2.12 Container controls toolbox	34
2.13 Listing controls	35
2.14 Exercise: Dating registration form	35
Self Assessment Exercises	37
Summary	38

3	Dialogs and forms	39
3.1	Introduction	39
3.2	User messages – The Message Box Dialog	39
3.2.1	Message Reply	40
3.3	Creating your own dialogs - Prompting for input	41
3.3.1	User input - Adding forms exercise	41
3.4	Splash forms and the Timer control	43
3.5	Accessing controls on other forms	44
	Self Assessment Exercises	46
	Summary	47
4	The C# Language – the basics	48
4.1	Introduction	48
4.2	Declarations - Variables and Data type identifiers.	48
4.2.1	Naming convention	49
4.2.2	Some declaration examples:	49
4.3	Assignments and operators	50
4.3.1	Shortcuts	50
4.4	Comments	51
4.5	Casting (converting) data types	51
4.6	Characters and strings	52
4.7	Logical operations – Boolean data type	52
4.8	Mathematical Functions	52
4.9	Date and Time	53
4.9.1	DateTime properties and methods	53
4.10	Scope	54
4.10.1	Block scope	54
4.10.2	Class scope	54
	Self Assessment Exercises	55
	Summary	56
5	The C# Language – arrays, structures and strings	57
5.1	Introduction	57
5.2	Arrays	57
5.3	Multidimensional arrays	58
5.3	Structures	59
5.3.1	The public declaration	60
5.4	Character arrays and strings	60
5.5	String manipulation	61
5.6	String conversion	61
5.7	String methods	62
5.7.1	The Substring() method.	62
5.7.2	The IndexOf() and IndexOfAny() methods.	62
5.7.3	Dealing with spaces – the Trim and Remove methods	63
5.7.4	The Replace method	63
5.7.5	The Split method - parsing strings	64
5.7.6	Upper and lower case methods	64

5.8	Dynamic Arrays. The ArrayList Class	65
	Self Assessment Exercises	65
	Summary	69
6	Program Flow, Loops and Decisions	70
6.1	Introduction	70
6.2	The if statement	70
6.2.1	if .. else statement	71
6.2.2	If else shortcut	71
6.3	The switch statement	72
6.3.1	The goto statement	74
6.3.2	Switching on a string variable	74
6.4	Looping - The for statement	74
6.4.1	The foreach statement	75
6.5	The while and do-while statements.	76
6.6	Exceptions. The try-catch code	78
	Self Assessment Exercises	79
	Summary	80
7	Object oriented programming: Methods and classes	82
7.1	Introduction	82
7.2	Method declaration	82
7.3	Parameter passing	84
7.4	Pass by reference – ref and out keywords.	86
7.5	Scope of a method – private and public.	87
7.6	Recursion	88
7.7	Calling an event	88
7.8	Classes and Namespaces	89
	Self Assessment Exercises	89
	Summary	90
8	Object oriented programming – creating objects	91
8.1	Introduction	91
8.2	Creating Objects	92
8.3	Constructors	95
8.4	The ToString method	97
8.5	Overriding	98
8.6	Adding Methods to a class	98
8.7	Method overloading	99
8.8	Static classes	100
8.9	Inheritance	101
8.10	Overriding methods	103
	Self Assessment Exercises	103
	Summary	104

9	File handling and menu dialogs	105
9.1	Introduction	105
9.2	File Types – Text (ASCII) or Binary	105
9.2.1	Text Files	105
9.2.2	Binary Files - Typed and Untyped files	105
9.3	File Dialog Boxes and MenuStrip control	105
9.3.1	The MenuStrip control – a simple RichTextBox editor	106
9.3.2	The OpenFileDialog	108
9.3.3	The SaveFileDialog	109
9.3.4	Open and Save Dialog Box properties	110
9.3.5	File error handling	110
9.4	Adding Menu items – About box	110
9.5	PrintDialog boxes	111
9.6	RichTextBox editor: cut, paste copy and find	111
9.7	File and Directory classes	112
9.8	File handling example	113
9.8.1	Using StreamWriter and StreamReader objects	113
9.8.2	Using BinaryReader and BinaryWriter objects.	113
	Self Assessment Exercises	115
	Summary	115
10	Graphics and Multimedia	116
10.1	Introduction	116
10.2	Drawing Graphics	116
10.3	The Paint event.	117
10.4	Drawing on the form	118
10.5	The Pen	119
10.6	The Brush	120
10.7	Drawing Text	120
10.8	Basic Shapes	120
10.9	Other shapes – arcs, pies, polylines and polygons.	121
10.10	Drawing Graphs and Charts	122
10.11	Multimedia applications	122
10.11.1	MediaPlayer events	124
	Self Assessment Exercises	124
	Summary	128
11	Debugging	129
11.1	Introduction	129
11.2	Writing to the Debug Window	129
11.3	Using the Debugger	130
11.3.1	Setting a breakpoint	130
11.3.2	Pausing the Program	132
11.4	Conditional Breakpoints	132
11.5	Restarting – Stepping code	133
11.6	The breakpoint windows	133
11.6.1	Local window	133

11.6.2	Watch window	134
11.6.3.	The Immediate window.	134
11.6.4.	The Call Stack.	134
	Self Assessment Exercises	135
	Summary	135
12	Threading	136
12.1	Introduction	136
12.2	Threads	136
12.3	Writing Thread Code	137
12.4	Thread sleeping example	138
12.5	Multiple Threading example	140
12.6	Accessing form controls from threads	141
12.7	Other Thread considerations	143
	Self Assessment Exercises	143
	Summary	143
13	Internet Applications	145
13.1	Introduction	145
13.2	Client-Server communication	145
13.3	TCP and UDP	145
13.4	Creating a TCP server.	146
13.5	Threads	146
13.6	Creating a TCP client	147
13.7	TCP Client-Server application	147
13.8	TCP Client Code	151
13.9	UDP communications – A chat program	153
13.9.1	UDPClient.Send()	154
13.9.2	UDPClient.Receive()	154
13.9.3	UDP program threads	154
13.9.4	UDP GUI design	155
13.9.5	UDP server code	156
13.9.6	UDP client code	158
13.10	A Local Chat program	159
13.11	Remote Chat program	160
	Self Assessment Exercises	161
	Summary	162
14	Introduction to Databases	163
14.1	Introduction	163
14.2	A typical database	163
14.3	Dealing with Databases	164
14.3.1	Viewing a database in C#	164
14.4	Creating a new database	166
14.5	Adding relationships – Database diagrams	169
	Self Assessment Exercises	172
	Summary	172

15	Displaying databases	173
15.1	Introduction	173
15.2	The dataset, data binding and ActiveX Data Objects (ADO.NET)	173
15.3	Displaying database information.	174
15.3.1	DataGridView	175
15.3.2	Details view	177
15.4	Viewing the data set	178
15.5	Structured Query Language (SQL)	179
	Self Assessment Exercises	181
	Summary	182
16	Accessing a database with code	183
16.1	Introduction.	183
16.2	Creating the database	183
16.2.1	Creating the database in Access	183
16.2.2	Creating a database from within Visual Studio	184
16.3	Displaying the database.	186
16.3.1	Add the Data Source	186
16.3.2	Select Database Objects	186
16.3.3	Accessing the database from code	188
16.3.4	Update the Database	190
	Self Assessment Exercises	191
	Summary	191
17	Plotting and Charts	192
17.1	Introduction	192
17.2	Plotting with Nplot	192
17.3	Obtaining the software	192
17.4	Adding NPlot to your project	193
17.5	NPlot Windows Form Tutorial	194
17.6	Drawing a graph	194
17.7	Graph exercise.	195
	Self Assessment Exercises	199
	Summary	199
18	Dynamic link libraries (DLL) and using Windows API	200
18.1	Introduction	200
18.2	Writing a DLL	200
18.3	Calling the DLL	201
18.4	Static Classes	203
18.5	Windows Application Program Interface (API)	204
18.6	Using Win API calls	204
18.7	MessageBox API example	205
18.8	Playing sounds	205
18.9	Unsafe code	206
18.10	DLL for measuring time	207
	Self Assessment Exercises:	208

Summary	209
19 Hardware interfacing	210
19.1 Introduction	210
19.2 The Serial and Parallel ports.	210
19.3 Visual Studio Serial Port control	210
19.4 Serial Port example program	210
19.5 Serial Port connections	212
19.5 The parallel printer interface.	212
19.6 Printer port connections	213
19.7 Accessing the parallel port	213
19.7.1 The hardware	214
19.7.2 The software	214
19.8 Oscilloscope application	216
19.8.1 Hardware interface.	216
19.8.2 Amplifier	216
19.8.3 Analogue to Digital converter.	217
19.8.4 Timing Diagram	218
19.8.5 The Oscilloscope Program	219
Self Assessment Exercises	224
Summary	224
20 USB interfacing	225
20.1 Introduction	225
20.2 The USB interface	225
20.3 USB Module installation and hardware	226
20.3.1 Installing the drivers	227
20.3.2 The DLL communication software	228
20.3.4 The hardware design.	228
20.3.5 Communications Protocol	230
20.4 USB Module Software	230
20.4.1 Setting outputs	232
20.4.2 Reading Inputs	233
Self Assessment Exercises	235
Summary	235
21 Conclusion	236
